

Globelics Thematic Reviews

Each Thematic Review in the series from the Globelics Secretariat gives an overview of research outcomes from the Globelics community as well as reflections on policy implications on a selected theme. The purpose is to inspire future research and to influence policy.

Insights from an open and diverse research network

The Globelics Thematic Review Series communicates insights from the Globelics community as well as reflections on policy implications on selected themes relevant and accessible to users outside academic circles, including policy makers and donor organisations. The intention is to offer practitioners **insights into the scholarly discussions as inspiration** for thoughtful and adequate practical actions and strategies.

Linking innovation and development

The Globelics network incorporates a wide span of social science disciplines and approaches. The focus on **learning, innovation and competence building systems** is a defining element of the analyses of a wide range of economic and social development processes and problems by scholars within the network.

Globelics is one of the few networks where there is an ongoing dialogue and cross-fertilisation between innovation studies and development studies. The two rather different traditions are in themselves both interdisciplinary and broad but their intellectual traditions are quite separate and they have so far tended to unfold in separate communities and engage with disparate policy circles.

The diversity of research approaches in the Globelics network is reflected in the Globelics Thematic Reviews.

Learning, Innovation and Inclusive Development: New Perspectives on Economic Development Strategy and Development Aid

Globelics Thematic Review 2012

The concepts of inclusive innovation and inclusive development have become widely used in international development donor organisations in their aid programmes. This is a broadly based change, not only in terminology, but also in the way we think about development.

Editors: Björn Johnson and Allan Dahl Andersen

Aalborg University Press, Aalborg, 2012

ISBN: 978-87-7112-058-5

Low-Carbon Innovation and Development

Globelics Thematic Review 2014

How can internationally coordinated low-carbon innovation and development contribute to climate change mitigation? This review brings together the development, climate change, and innovation agendas to offer insight into an innovation perspective on low-carbon development.

Editors: Rasmus Lema, Björn Johnson, Allan Dahl Andersen, Bengt-Åke Lundvall and Ankur Chaudhary

Aalborg University Press, Aalborg, 2014

ISBN: 978-87-7112-133-9

Natural Resources, Innovation and Development

Globelics Thematic Review 2015

Monoculture implies vulnerability and instability. Therefore, the key issue for the countries now specialised in the production and export of natural resource commodities is to engage in an economic transformation where a diversified economy is built upon the natural resource base.

Editors: Allan Dahl Andersen, Björn Johnson, Anabel Marín, Dave Kaplan, Lilia Stubrin, Bengt-Åke Lundvall and Raphael Kaplinsky

Aalborg University Press, Aalborg, 2015

ISBN: 978-87-7112-370-8

Health Systems Strengthening: Rethinking the Role of Innovation

Globelics Thematic Review 2016

The new framework (the "4Fs") for analysing and understanding how health systems do or do not lead to effective, inclusive and equitable health outcomes is introduced to offer a fresh look at how innovation systems thinking may contribute to strengthening health systems in low and middle income countries.

Authors: Rebecca Hanlin and Margrethe Holm Andersen

Aalborg University Press, Aalborg, 2016

ISBN: 978-87-7112-584-9
